

Mobile Device Management

Stratix Mobile Device Management

Stratix's Mobile Device Management service gives you access to an engineering team to augment your staff providing innovative mobile device management designs to solve business challenges and implement an effective and stable environment.

Our Capabilities:

- **Solution Selection** – Stratix can perform a needs analysis to determine which EMM solution best suits your needs
- **Best Practices Configuration** – From user roles to alerts, Stratix will optimally design the environment to efficiently manage your devices
- **Daily Administration and Change Management** – Analyze system logs and dashboard daily with expert level support to remotely administer changes and resolve issues
- **Application Updates** – Deploy commercial or custom applications and maintain an application repository with support for multi-hour, complex deployments

WHY Stratix

When you partner with Stratix for Mobile Device Management services, you get a partner with deep experience to design and implement capable solutions and the ability to scale for all your business mobility needs.

- Expertise with complex, large scale environments
- Agnostic services with broad MDM solution expertise
- Integration with holistic mobile lifecycle management

Outcomes We Deliver

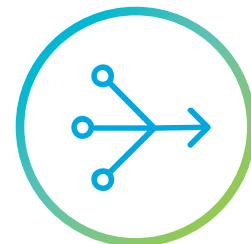

Greater ROI

Improve your MDM / EMM return on investment through daily administration, use of best practices, and a positive end user experience

Mitigate Risks

Mitigate mobile security risks with a dedicated team of resources to secure your devices using device PIN/password, data encryption, and certificate management

Simplify Management

Simplify overall management of your MDM / EMM solution and reduce the on-going maintenance burden on your IT team
