Mobile Integration Center

stratix
Nonstop Mobility.

Integration and Deployment Capabilities

Large mobile deployments are dependent on the reliable rollout of mobile devices that can be purchased and configured at scale to deliver a personalized mobile experience right out of the box. This is where Stratix excels. Our years of experience deploying complex, large scale projects ensures your rollout will be on-time and on-budget, every time.

Our streamlined integration and deployment capabilities begin with the creation of a First Article standard, by your assigned Mobile Solutions Architect. Stratix will coordinate the delivery and inspection of all devices at our location and then configure, activate, load content and enroll devices to be fully compliant with your security policies, according to the First Article. Once the devices have been quality inspected, our in-house team will kit and package the devices & accessories, enclose the related documentation and ship it directly to specified locations or directly to your end users.

Our Capabilities

- **Technology Acquisition:** Procurement, receiving, handling, management, recording and inspection of all devices

- **Configuration:** Staging, provisioning, carrier activation, MDM enrollment and testing of all devices

- **Deployment:** Kitting, packaging and shipping to multiple locations at the scale and speed your business needs

- **Asset Tracking:** Automated upload of shipment tracking information to itrac360 asset management portal

> *"When I speak of Stratix the first thing that comes to mind is true partnership! They have come along side us and assisted on our initial mobile deployments, they are truly the experts. We continue to grow this partnership year over year as we continue to expand and refresh our mobile technologies."*
